MATH-103: Plane Trigonometry

With trigonometry, you'll have the power to understand the geometry of the world around you like never before. You'll dive into the fascinating realm of triangles and the unit circle, learning how to use special functions and graphs to tackle real-life problems. You'll master identities that simplify complex equations and explore polar coordinates, a unique way to pinpoint locations on a plane. We will also introduce you to vectors which are fundamental to the world of physics and engineering, allowing us to explore concepts like force and motion in a whole new light. This class is the study of trigonometric functions, their inverses and their graphs, identities and proofs related to trigonometric expressions, trigonometric equations, solving right triangles, solving triangles using the Law of Cosines and the Law of Sines, polar coordinates, and introduction to vectors.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

MATH-110: Introduction to Statistics

This course will introduce statistical investigation. A statistical investigation begins with a research question. Then the investigation proceeds with the following steps: -Produce data: Determine what to measure then collect the data -Explore the data: Analyze and summarize the data (also called exploratory data analysis), -Use probability to understand how samples vary -Draw a conclusion about the population. In this course, we detail and apply these sequenced steps. Your learning will be supported by technology to produce, interpret, present, and draw conclusions from data.

MATH-250: Single Variable Calculus I

Introduction to differential and integral calculus, including functions, limits, and continuity; techniques and applications of differentiation including derivatives of algebraic and transcendental functions, the chain rule, implicit differentiation, the Mean Value Theorem, curve sketching, extremum problems, and related rates; and an introduction to integration and The Fundamental Theorem of Calculus. If purchasing a used textbook, new software access may need to be purchased at an additional expense. Ask instructor for details.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite(s): Eligibility for MATH 250 is determined through the Crafton Hills College Placement process, or Math 102 and MATH 103, both with a grade of C or better, or Math 160 with a grade of C or better.
