Chemistry

CHEM-101: Introduction to Chemistry

Introduction to college chemistry, with an emphasis on the general principles of chemistry, including critical thinking, analysis and problem solving in chemistry. Topics include the study of matter, bonding, the periodic table, stoichiometry, chemical reactions, nomenclature and organic chemistry. Laboratory component is both qualitative and quantitative in scope. Critical thinking, writing, measurement, identification and analysis are emphasized.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Recommendation: MATH 102.

Certified NursingAssistant NC

CNA/N-621: Nursing Assistant Theory

This noncredit course focuses on the fundamental principles of basic nursing care necessary to meet the hygiene, comfort, and safety needs of residents. The identification and reporting of resident abuse along with development of skills in communication and interpersonal relations will be discussed. The role of the CNA as part of the health care team and practice of skills to pass the state

certification exam are highlighted. The course follows the guidelines established by the California Department of Public Health (CDPH). Successful completion of the course does not ensure certification, which is obtained through the CDPH. Application and related forms are provided at the information session.

Credit Type: Noncredit course.

Limitation on Enrollment: Must attend a mandatory information session, once provisionally accepted, must attend a mandatory orientation, meet all health requirements, and have a clear livescan fingerprinting. Must be 16 years or older. No high school or GED required. Must be co-enrolled with CNA/N-621 and CNA/N-623.

Psychology

PSYC-102: Personal and Social Adjustment

Examination of human capacity to change, adapt, and cope with a variety of circumstances over the life span. Special attention is paid to the sociocultural contexts of adjustment, the role of self understanding in adjustment, stress, adult development, careers, and family issues. A variety of theoretical perspectives will be used to review healthy and unhealthy behavior patterns as well as coping techniques for day-to-day concerns.

Credit Type: Earned units for this course are applicable to an Associate Degree.

PSYC-120: Statistics for the Social and Behavioral Sciences

The use of probability techniques, hypothesis testing, and predictive techniques to facilitate decision making. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance; chi squared and t-tests; effect size; confidence intervals; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings, especially for practical applications using data from disciplines such as the social sciences, health care and education. While the STAT C1000 class approaches these topics with a firmer grounding in the principles of mathematics, this PSYC 120 does cover the mathematical basis of statistics, probability theory and estimation, but focuses on the interpretation and application, uses and misuses, and the analysis and criticism of statistical arguments in public discourse.
