KIN/S-138D: Pickleball IV

Development of advanced-level playing and competitive skills in pickleball. Instruction in the advanced skills, techniques, strategies, along with rules and etiquette. Pickleball features simple rules and is easy to learn. Because less experienced players can enjoy the sport almost immediately, while advanced players experience it as a fast-paced, highly competitive game, pickleball is suitable for individuals of all ages, fitness levels, and athletic abilities.

Library Science

LIBR-101: Introduction to Library Services for Support Staff

This course will introduce the basic concepts of providing library customer service by anticipating and maintaining awareness of users' needs. The roles of Library Technicians and support staff in a variety of library environments will be explored along with the tools and technologies used in libraries for various functions. Students will gain an understanding of limited library resources and will apply their knowledge to solutions-based decision-making.

Credit Type: Earned units for this course are applicable to an Associate Degree.

LIBR-103: Introduction to Library Technology

This course introduces the general trends and developments in technology applications for library functions and services in a variety of library environments. The technology tools explored in this course include integrated library systems, data gathering and library databases. Students will develop the skills to promote library services, resources and collections with the use of appropriate technologies.

MATH-103: Plane Trigonometry

With trigonometry, you'll have the power to understand the geometry of the world around you like never before. You'll dive into the fascinating realm of triangles and the unit circle, learning how to use special functions and graphs to tackle real-life problems. You'll master identities that simplify complex equations and explore polar coordinates, a unique way to pinpoint locations on a plane. We will also introduce you to vectors which are fundamental to the world of physics and engineering, allowing us to explore concepts like force and motion in a whole new light. This class is the study of trigonometric functions, their inverses and their graphs, identities and proofs related to trigonometric expressions, trigonometric equations, solving right triangles, solving triangles using the Law of Cosines and the Law of Sines, polar coordinates, and introduction to vectors.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

MATH-110: Introduction to Statistics

This course will introduce statistical investigation. A statistical investigation begins with a research question. Then the investigation proceeds with the following steps: -Produce data: Determine what to measure then collect the data -Explore the data: Analyze and summarize the data (also called exploratory data analysis), -Use probability to understand how samples vary -Draw a conclusion about the population. In this course, we detail and apply these sequenced steps. Your learning will be supported by technology to produce, interpret, present, and draw conclusions from data.

MATH-110H: Introduction to Statistics- Honors Statistics-Honors

This course will introduce statistical investigation. A statistical investigation begins with a research question. Then the investigation proceeds with the following steps: -Produce data: Determine what to measure then collect the data -Explore the data: Analyze and summarize the data (also called exploratory data analysis), -Use probability to understand how samples vary -Draw a conclusion about the population.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Prerequisite: Acceptance into the College Honors Institute and MATH 095 or eligibility for MATH 110H as determined through the Crafton Hills College assessment process.

Alternate Listing: This course is also offered as MATH-110.

MATH-141: Calculus for Business

Business Calculus, where mathematics meets the world of commerce in an exhilarating journey of discovery! Delve into the fundamental principles of functions, limits, and the dynamic interplay of differentiation and integration. This course propels you through the exploration of polynomial, rational, exponential, and logarithmic functions, equipping you with the mathematical prowess crucial for real-world applications in business and economics. Brace yourself for the intricacies of partial derivatives and witness the transformative impact of calculus in multivariable scenarios.

Physics

PHYSIC-100: Introduction to Physics

Introduction to the ideas, concepts, and theories of physics including mechanics, waves, heat, electromagnetism, and atomic and nuclear structure. This course does not require students to have extensive knowledge of mathematics.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU. Limited transfer to UC; contact a counselor for details.

Departmental Recommendation: Eligibility for MATH 095.
