Note: Once registered for the class, students will need to complete the online class that will take approximately 3 hours. Since this is a blended learning course, a student completes part of the course in a self-directed manner online, followed by a hands-on skills session in person with an ARC Instructor. ARC eLearning courses are fully self-directed, and do not require a separate hands-on skills session. The materials needed to be completed will be e-mailed to them to their Crafton's email address from the American Red Cross. Once students have completed this portion, the instructor will be notified. This must be done before the beginning of the class.

LIBR-103: Introduction to Library Technology

This course introduces the general trends and developments in technology applications for library functions and services in a variety of library environments. The technology tools explored in this course include integrated library systems, data gathering and library databases. Students will develop the skills to promote library services, resources and collections with the use of appropriate technologies.

MATH-103: Plane Trigonometry

With trigonometry, you'll have the power to understand the geometry of the world around you like never before. You'll dive into the fascinating realm of triangles and the unit circle, learning how to use special functions and graphs to tackle real-life problems. You'll master identities that simplify complex equations and explore polar coordinates, a unique way to pinpoint locations on a plane. We will also introduce you to vectors which are fundamental to the world of physics and engineering, allowing us to explore concepts like force and motion in a whole new light. This class is the study of trigonometric functions, their inverses and their graphs, identities and proofs related to trigonometric expressions, trigonometric equations, solving right triangles, solving triangles using the Law of Cosines and the Law of Sines, polar coordinates, and introduction to vectors.

STAT-C1000H: Introduction to Statistics - Honors

This course is an introduction to statistical thinking and processes, including methods and concepts for discovery and decision-making using data. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and line arregression; analysis of variance, chi-squared, and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Students apply methods and processes to applications using data from a broad range of disciplines.This is an honors course. (Previously MATH-110H)

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Prerequisite: Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.

Alternate Listing: This course is also offered as STAT-C1000.
