Mathematics

MATH-102: College Algebra for STEM

A college-level course in algebra for majors in science, technology, engineering, and mathematics (STEM). Study of polynomial, absolute value, rational, exponential, logarithmic, and radical functions; sequences, series, and the Binomial Theorem; graphing conic sections; inverse functions; solving systems of linear and non-linear equations, including the use of matrices and determinants; and the theory of equations. Students who purchase a used textbook may need to purchase software at an additional expense. Ask instructor for details.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: Eligibility for MATH 102 as determined through the Crafton Hills College assessment process or completion of Intermediate Algebra.

MATH-103: Plane Trigonometry

With trigonometry, you'll have the power to understand the geometry of the world around you like never before. You'll dive into the fascinating realm of triangles and the unit circle, learning how to use special functions and graphs to tackle real-life problems. You'll master identities that simplify

complex equations and explore polar coordinates, a unique way to pinpoint locations on a plane. We will also introduce you to vectors which are fundamental to the world of physics and engineering, allowing us to explore concepts like force and motion in a whole new light. This class is the study of trigonometric functions, their inverses and their graphs, identities and proofs related to trigonometric expressions, trigonometric equations, solving right triangles, solving triangles using the Law of Cosines and the Law of Sines, polar coordinates, and introduction to vectors.

Credit Type: Earned units for this course are applicable to an Associate Degree.

MATH-110: Introduction to Statistics

This course will introduce statistical investigation. A statistical investigation begins with a research question. Then the investigation proceeds with the following steps: -Produce data: Determine what to measure then collect the data -Explore the data: Analyze and summarize the data (also called exploratory data analysis), -Use probability to understand how samples vary -Draw a conclusion about the population. In this course, we detail and apply these sequenced steps. Your learning will be supported by technology to produce, interpret, present, and draw conclusions from data.
