What Is Alcohol Abuse?

To some college students, heavy drinking that leads to vomiting is not alcohol abuse but simply having a good time and being "one of the gang." To many whose religion requires abstinence, simply tasting an alcohol beverage is not only alcohol abuse but a sin. To many activists, a married couple quietly enjoying a drink with their dinner is guilty of abusing alcohol if they happen to be twenty years of age. To the National Highway Traffic Safety Administration, an accident is alcohol related (and implicitly caused by alcohol abuse) if a driver who has consumed a drink is sitting at a red light and rear-ended by an inattentive teetotaler. While the moderate consumption of alcohol is associated with better health and longer life than is abstinence, the heavy consumption of alcohol, especially over a period of many years, can lead to serious health problems and even death.
