Cellular Phone Etiquette in College

In The Classroom

If there's one area on a college campus where the consensus agrees that using a cell phone is a no-no, it's in the classroom.

"We are moving toward a common etiquette for cell phone use in certain settings, but you'd be surprised how often we still get interrupted by it during class," says Scott Campbell, a professor at the University of Michigan who has studied cell phone use on campus. "Depending on what's going on at the time, it can be very distracting, not to mention rude."

Loud ringtones and even whispered phone conversations are unwelcome in the classroom setting. Texting may seem like a quieter alternative, but even texting can become a distraction for both professors and other students.

In The Library

Academic libraries are often the last bastion of peace and quiet on a college campus--until someone's unattended phone starts ringing.

Cell phones are not banned in most college libraries, but other students and librarians alike discourage their use in the stacks and study areas.

"Be considerate of your colleagues who are trying to concentrate on a 415 -page book that they must summarize by the next day," says Regent University Reference Librarian Karen Robinson. "Talking is distracting, and so is a ringing phone--whether it is on your person or left behind on a study table."
