Campus Alerts

SBVC –Beware of the construction.

CHC – Beware of the construction.

See page 2 for additional incidents

10 Tips for Fire Safety

1 - Crawl low under smoke to your exit. If you have to escape a fire through smoke, crawl low, keeping your head 12 to 24 inches above the floor, where the air is cleaner.

2 - Plan your escape. Make a home escape plan and hold regular fire drills so everyone in your household knows what to do in an emergency. When escaping a fire, feel the cracks around doors with the back of your hand before opening them. If they are warm, try another escape route.

3 - Install smoke detectors. Install smoke alarms on every floor of your home, inside and outside the bedrooms. Test them once a month, and replace your batteries twice a year.

4 - Be careful with smoking materials. Never smoke in bed or when you're drowsy or have been drinking or taking medications.

5 - Use electrical safely. Replace damaged electrical cords and repair appliances the smell, smoke, or overheat.

6 - Cook Safely. Never leave cooking unattended, and keep cooking areas clean and uncluttered.

7 - Space heaters need space. Keep portable and space heaters at least three feet from anything that could possibly burn or ignite.

8 - Keep matches and lighters out of sight. Keep matches and lighters away from children. Store them up high in a locked cabinet.

9 - Have a home fire extinguisher available. Keep a ABC type of fire extinguisher in your home. Make sure that the unit is charged. Common places to keep an extinguisher are the kitchen, the garage, and the basement.

10 - Stop, drop, and roll if your clothes catch fire. If your clothing catches fire, STOP - DO NOT RUN. Drop to the ground. Roll over and over to smother the flames.
