Strategic Initiatives Addressed:	3,5,6			

Replacement Growth

1. Provide a rationale for your request.

Since 1993 we have been using Perkins for hiring professional experts, supplanting instead of supplementing. Our current line of sight is a safety issue. We have a(inside lab, outside lab) new spray booth, old spray booth. All three areas are 100 ft. apart. The addition of a full time lab tech. would provide support and wellbeing of our students.

2. Indicate how the content of the latest Program Efficacy Report and current EMP data support this request How is the request tied to program planning? (*reference the page number(s) where the information can be found on Program Efficacy*).

On the 1st. page of the Automotive 2012- 2013 EMP under Program Goals, Challenges and Opportunities.

3. Indicate if there is additional information you wish the committee to consider (*for example: regulatory information, compliance, updated efficiency, student success data, or planning, etc.*).

4. What are the consequences of not filling this position?

Consequences will be too late if we do not place a high priority on workplace safety.
