

**CLASSIFIED STAFF NEEDS ASSESSMENT APPLICATION**  
**Fall 2016**

Name of Person Submitting Request:	<b>Robert Jenkins</b>		
Program or Service Area:	<b>Grounds</b>		
Division:	<b>Administrative Services</b>		
Date of Last Program Efficacy:	<b>November 2014</b>		
What rating was given?	<b>Continuation</b>		
Current number of Classified Staff:	5FT: <input type="text"/>	PT: <input type="text"/>	<input type="text"/>
Position Requested	<b>1 Grounds man</b>		
Strategic Initiatives Addressed: (See <a href="http://www.valleycollege.edu/about-sbvc/office-of-president/college_planning_documents/documents/strategic-plan-report-working-doc-8-25-15-2.pdf">http://www.valleycollege.edu/about-sbvc/office-of-president/college_planning_documents/documents/strategic-plan-report-working-doc-8-25-15-2.pdf</a> )	6.1.4 Maintain landscaping that is attractive and well suited to the climate		

Replacement  Growth

If you checked replacement, when was the position vacated? \_\_\_\_\_

1. Provide a rationale for your request. (Explain, in detail, the need for this position.)

The Grounds Department maintains the campus grounds, including daily trash and litter collection; maintenance of grass, shrubbery, and trees; irrigation control and maintenance, as well as assistance to the Athletics Department in maintaining competition-level sports fields. The campus was divided by zones and assigned to each staff member for complete accountability, whether mowing, trash pickup, trimming, irrigation maintenance. The re-assignment included numerous areas/pockets that were not being maintained. In an effort to maintain the landscaping, it is sometimes necessary for everyone on the Grounds crew to focus on a particular area. The focus on a particular area of the campus, from time to time, is necessary to maintain the landscaping at an acceptable level.

The Grounds crew is responsible for approx. 65 acres, which does not include buildings or the construction areas. The landscaping between the new gym building and the Planetarium has been turned over to Grounds, adding about 5 acres, including approx. 150 additional trees to maintain. Another 3 acres are scheduled to be completed by next summer. This averages out to approx. 14.6 acres/man for all trimming, mowing, and trash pickup on campus.

The crew spends the first couple of hours each day picking up trash and other debris around the campus. This equates to 20% of their shift picking up trash with the current level of acreage and students. The FTES is expected to grow in the next 2 years. Additional students and additional acreage will produce additional trash.

2. Indicate how the content of the latest department/program's Efficacy Report and current EMP support this request and how the request is tied to program planning. How is the request tied to program planning? (Directly reference your current Efficacy Report and EMP in your discussion).

As per the documentation on pages 3 – 8 of the M&O efficacy report completed November 2014, the performance of the grounds staff is stretched to the limits. With an increasing student

population every year, the amount of time needed to maintain the campus will increase as well. The principal weakness of the department is a staffing level that does not meet the daily needs of the campus. Many of the more complex grounds requests, such as tree trimming, mulching, aerating and fertilizing go unfilled for weeks, until there is a break in the school schedule, summer time, or some other factor. Vacations, illness, long-term absences, and other dynamics of life affect consistent attendance. Age is already a factor on those with lengthy careers. Current budgets do not allow for additional staff at this time.

3. Indicate any additional information you want the committee to consider (*for example, regulatory information, compliance, updated efficiency, student success data, planning, etc.*).

The appearance of the campus is the first impression students and their families see when arriving. First impressions are critical when students and their families are deciding to attend here. Unkempt lawns, shrubbery, trees, and excessive trash lying around parking lots and buildings instantly give visitors the impression that San Bernardino Valley College does not care, which is the exact opposite of our mission.

One member of the grounds crew spends at least 20% of his time (after picking up trash) completing tasks in support of events every day. This leaves the remaining four grounds personnel to take care of the rest of the campus.

4. What are the consequences of not filling this position?

Approx. 5 additional acres of well landscaped ground has been added, with three more next year. The challenge to maintain our campus will come at the cost: additional sick leave, frustration among staff, and the inability to maintain an acceptable level of appearance of the campus. Some areas of the campus get skipped at the expense of special event support or absenteeism. An increasing student population will only add to the work load.
