

FACILITIES NEEDS ASSESSMENT APPLICATION
Fall 2016

Facilities: Programs should list no more than three facility or renovation items. Identify the area in need of physical renovation, maintenance and/or repair. Requests for additional space should also be listed here. *Requests listed in this category will be forwarded to the Facilities Committee to evaluate through their own processes.* Provide a thorough rationale, **using data to support your request**, in order to help the Facilities Committee with their evaluation. List the approximate cost of your request.

Name of Person Submitting Request:	David Rubio
Program or Service Area:	Athletics
Division:	Social Science. Human Development, Kin/Athletics
Date of Last Program Efficacy:	Fall 2016
What rating was given?	Continuation
Strategic Initiatives Addressed: (See Appendix A: http://tinyurl.com/l5oqoxm)	Access, Student Success, Institutional Effectiveness, Planning, Campus Climate

Replacement

Growth

1. Renovation Request

Softball Field Reinstalled. Currently our softball team is not competing on our campus. Our softball team is playing and practicing all of its games at Chavez Park in Colton. This put our team at a disadvantage with lack of institutional support such as; proper/safe field maintenance, consistent institutional oversight, proper safety and security support, proper and secure storage of equipment. It is a logistical problem for support staff to properly support game management. It very difficult to maintain a successful program without the proper institutional support.

Approximate Cost: Bare minimum cost: \$500,000.00

2. Renovation Request

Strip, Level, Reseed Soccer Field and Replace Sprinkler System. Our soccer field is also used as a throw field for track and a jogging area for cross country. The college has recently done some maintenance on the soccer field but, this is basically a band aid and does not address the major concern of an unsafe playing surface that has a poor irrigation system. It is dangerous when student/athletes are running full speed on an uneven surface. We have over 100 students practicing and competing on this facility each semester and EMP data shows this facility/classroom is consistently used a high rate, retention and success is above college average and shows an increase.

Approximate Cost: Minimum cost: \$250,000.00

3. Renovation Request

Strip, Level, Reseed Baseball Outfield. Our baseball outfield is just as bad if not worse than our soccer field. It has an uneven playing surface in which student/athletes can injure themselves. The sprinkler system is outdated and inadequate. There has been no upgrade or repair on the

outfield since I have been here (25 years). We have as much 80 student/athletes practicing on this field at one time. EMP data shows this facility/classroom is consistently used at a high rate, retention and success is above college average and shows an increase.

Approximate Cost: Minimum Cost: \$250,000.00
