

Report to the Academic Senate
Program Review: Fall 2009
Evaluation and Revision

Due to the California budget situation, the Program Review committee did not conduct Needs Assessment this semester. Instead, the committee used the time to evaluate and revise the three year program review cycle based on feedback from the campus community, committee members and focus group studies. The committee focused on two basic issues. 1. Should the needs assessment process be removed from Program Review and become part of the Budget Committee charge. Should needs assessment continue to collect information to be forwarded to the Technology committee and Facilities committee. 2. Examining the efficacy process including the three year cycle, forms, areas required to report and making program efficacy a 'friendlier' process while still maintaining high standards.

Needs Assessment:

- Needs Assessment will stay with the Program Review Committee and resume Fall 2010
- Operational Items to be removed from the process (for instance: licenses; toilet paper; minimum wage increases; AV bulbs; whiteboards)

Program Efficacy discussions included:

- Continue reviewing programs on a 3 year cycle
- Combine programs for reporting when appropriate
- Revise and simplify efficacy forms
- To enhance committees understanding of a program committee will and efficacy send a team to personally review the program; ask questions to clarify information presented in the efficacy documents and solicit more information.
- Efficacy team will provide a written report and make an overall recommendation to the committee
- Vice-Presidents will not be part of the Efficacy team, but will be available to answer questions and provide the team with additional information

Committee will be meeting on 12/4/09 to finalize efficacy process for Spring 2010.

3 Year Cycle: Program Review Results

	Reporting in 09/10	Reporting in 10/11	Reporting in 11/12
