This training was wonderful, thank you for providing this to us!! Dennis did an amazing job facilitating the training like a true professional. He was engaging, approachable, and I loved the references to his experiences as a MFT. The resources that were provided to participants are also great! I have started reading the book provided and I am looking forward to our team diving into the activities provided for daily huddles. I have spoken with my manager and he is on board with continuing this work. I am very grateful for the full package/access that the district has provided to us as employees.

CURRENT

I believe that this training is vital to the continued growth and success of the district as a whole. Trust is vital in moving this institution forward and has been seriously lacking in the 11 years I have been here. I applaud Kristina Hannon for getting us this training and insisting that everyone in the district attend.

IT was a good day. all around positive. I'm still skeptical about the evidence used to "sell" this notion/exercises that work.

CURRENT

While the workshop was well presented and provided useful information, I felt a lot of information was crammed into one day. The concept is a good one, but not very helpful if the participants are the people I already trust and those relationships which I would want to improve upon - those people didn't attend. It will be interesting moving forward. I don't know how many people outside of close relationships I would ever use those cards on. I would understand if my supervisor presented me with the card and opened dialogue.

CURRENT

The training was informative. There was a lot of good discussion and although the topic of trust can be difficult, the presenter did a great job explaining the nuances of individuals needs. Based on the conversations during the day, it seemed like this was eye opening and beneficial.

CURRENT

This was a wonderful training. I walked away with valuable information. In addition to meeting colleagues. My only personally unfavorable part was a lot of information packed into one day, I did feel a bit pverwhelmed at the end.

CURRENT

Information and material were great. I think there was way too much material presented in one day. It would be helpful to understand the purpose and create some clear expectations around how this is to be implemented by all.

CURRENT

I found a lot of the information and practice valuable. If I have any criticism, I feel it went a little too long, but I signed up for it knowing the length. The room and tables felt very cramped, making it difficult to work in groups and move around. Also, thank you for providing lunch and sandwiches, as that facilitated a much quicker time in getting lunch than a lengthy buffet.

CURRENT

The training was wonderful. Half hour lunch was too short. Needed a break from all the material at once.
