ANTHRO-106H: Biological Anthropology - Honors

This course introduces concepts and methods used to study the human species in a scientific, evolutionary framework. Topics covered include evolutionary theory, genetics, the fossil record of human ancestors, comparative primatology, human variation, and interactions between biology and culture. This course is intended for students in the Honors Program but is open to all students who desire more challenging course work.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

ARCH-212: Design Studio III

This upper-level architectural design studio focuses on the principles and applications of environmental design in relationship to architecture, landscape architecture, and urban design and planning. The course emphasizes how sustainability and environmental considerations can be an integral part of the design process, and teaches the applicability and relevance of those considerations for questions of climate justice and equity. Design investigations will focus on a series of a multi-unit housing complex or mixed-use building on an urban site in the San Bernardino or Los Angeles region.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: ARCH 113.

Departmental Advisory: ARCH 202.

ARCH-213: Design Studio IV

This upper-level architectural design studio integrates regulatory, site, and social considerations into a sustainable design response that addresses/mitigates climate risks. The focus is on sustainability and energy-efficiency, with a reflection on the environmental and social impact of an architectural design proposal on a given site and surrounding context. Emphasis is on multiple scales of design, from the detailed wall section and building envelope to the structural, energy, and spatial organizational system guiding the design process. Investigations will stress logical organization, craftsmanship, technical skills, vocabulary, and physical object-making through the design of complex building types. Design investigations will focus on a public building complex in a given neighborhood in the Southern California region that is facing social, environmental, and climate risks.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Prerequisite: ARCH 212.

Astronomy

ASTRON-120: Introduction to Astronomy

This is an introduction to astronomy, the ultimate adventure. Our very big universe can be described by a small set of knowable rules through a logical method called science, where the excitement of an evolving and sometimes violent universe of stars and galaxies is explored. Topics include the night sky, motions of the Sun, the Moon, and the planets, light, properties and life-cycles of stars with a detailed look at our Sun, galaxies, and the origin of the universe.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Advisory: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

ASTRON-125: Astronomy Laboratory

This course is the companion course to ASTRON 120 Introduction to Astronomy. Laboratory work provides a hands-on enrichment and deeper understanding of topics discussed in the astronomy lecture. Topics include use of star maps, identification of constellations, determination of orbits, rotation rate, and mass of celestial objects using astronomical methods of observation and analysis.

Students will also perform 3-D modeling of the solar system and constellations, study the nature of light, lenses and telescopes, make some direct observations with telescopes, and utilize astronomical software.

BIOL-205: Cell and Molecular Biology

This course is an introduction to cellular and molecular aspects of biology emphasizing principles of scientific process, evolution by natural selection, prokaryotic and eukaryotic cell structure and function, classic and modern genetics, and concepts that integrate cellular with organismal activities. Experimental design concepts and application are emphasized in the laboratory. This is

the first semester of three introductory biology courses for the pre-professional, biology major, environmental science or others interested in an in-depth study of biology.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: Eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

BIOL-206: Organismal Biology

This course is an introduction to the diversity of organisms, their structure, function, and adaptations to the environment. The course requires participation in field trips and outdoor classroom (Living Lab Garden and Oak Garden) activities. This course is part of three introductory biology courses for the pre-professional, biology major, environmental science or others interested in an in-depth study of biology.

BIOL-260: Human Anatomy

This is a comprehensive lecture/laboratory course in human anatomy. It is organized to explore the body both regionally and systemically. The course studies gross anatomy with an extensive dissection of the cat and other significant organs. Relevant comparisons to human systems and structures are emphasized in the laboratory portion of the course. Histological and cellular anatomy are included as they apply to various structures and systems.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

BIOL-261: Human Physiology

This course is the second semester of a two-semester sequence. It builds on an understanding of structure to explain the dynamic functions of the human body to a cellular level. Topics include physiology of the following systems: muscular, skeletal, nervous, endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive. Homeostatic mechanisms and the interrelationships of body organ systems are emphasized and enhanced with clinical illustrations.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisites: BIOL 260 and CHEM 105 or CHEM 101.

Departmental Advisory: BIOL 100.

CHEM-105: Introduction to General, Organic and Biochemistry

This course provides a foundation for the concepts of general, organic, and biochemistry for students who wish to pursue allied health fields such as nursing. Some of the areas studied include the physical and chemical properties of common elements and compounds, the SI system, measurements and conversions, atomic structure, the periodic table, chemical equations and calculations, gases, solutions, electrolytes as well as an introduction to the bonding, naming, structure, and chemical and biological properties for different classes of organic compounds and biomolecules, with a focus on their cellular, medicinal and commercial importance.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Child Development

CD-101: Parent-Child Interaction

This course includes general concepts, goals and strategies of parenting through the life span in varying life circumstances and diverse family types. Establishing and maintaining close emotional relationships through bonding, attachment, and effective communication techniques with children at all developmental stages is emphasized. Effective guidance skills, shaping and modifying children's behavior are explored.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Departmental Advisory: READ 015.

CD-105: Child Growth and Development

This introductory course examines the major physical, psychosocial, and cognitive/language developmental milestones for children, both typical and atypical, from conception through adolescence. There is an emphasis on interactions between maturational processes and environmental factors. While studying developmental theory and investigative research methodologies, students will observe children, evaluate individual differences and analyze characteristics of development at various stages.

CD-105H: Child Growth and Development - Honors

This introductory course examines the major physical, psychosocial, and cognitive/language developmental milestones for children, both typical and atypical, from conception through adolescence. There is an emphasis on interactions between maturational processes and environmental factors. While studying developmental theory and investigative research methodologies, students will observe children, evaluate individual differences and analyze characteristics of development at various stages. This course is intended for students in the Honors Program but is open to all students who desire more challenging course work.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: ENGL 101 or ENGL 101H.

CIT-232: Computer Network Fundamentals

This course introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of IP (Internet Protocol) addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for further study of computer networks. It uses the OSI (Open Systems Interconnection) and TCP (Transmission Control Protocol) layered models to examine the nature and roles of protocols and services at the application, network, data link, and physical layers. It provides preparation for the CompTIA Network+ certification exam.

CS-075: Introduction to Web Development

This course focuses on web development and addresses the essentials for skilled web developers who can create digital media, web, and mobile applications for modern desktop and portable devices. Students in this program are offered an in-depth, project-driven curriculum that provides a comprehensive study of HTML, CSS, JavaScript, Web Animation, Multimedia Creation. Students will learn to develop visually aesthetic, user friendly, and interactive web-based applications. Students will also gain valuable experience using front end and backend development tools like Adobe Dreamweaver, Adobe Animate, and Visual Studio. Students will also be exposed to the programming languages that cross over from web development to mobile device development. The synergy between the many web and mobile technologies will help each student build a foundation suitable for professional content.

GEOG-102: Cultural Geography

Are you fascinated with the enormous diversity of culture, language, religion, economics, politics, urbanization, agriculture, and ethnicity around the world? Have you ever wondered how this developed? Are you concerned about human rights, social justice, climate change, and access to clean drinking water, healthcare, education, and resources? Using the tools of geography, this course will help you to understand how humans interact each other and how humans interact with the environment.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Advisory: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

GEOG-110: Physical Geography

You may have noticed that Earth's atmosphere, life forms, water resources, and landforms vary considerably from one place to another. This class helps you to understand how and why these variations occur, how the environment impacts us humans, and how we humans impact the environment. People from different backgrounds experience environmental impacts differently, so environmental justice is interwoven throughout this course. GEOG 111/GEOG 111H is strongly recommended for students who desire to transfer to CSU/UC. It is recommended that students complete GEOG 111/GEOG 111H within three years of completing GEOG 110.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Advisory: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

GEOG-111: Physical Geography Laboratory

In this laboratory companion for the GEOG 110 physical geography lecture course, you will use hands-on, in-class and field-based experiences to better understand and appreciate how and why Earth's atmosphere, life forms, water resources, and landforms vary considerably from one place to another. Because we humans are part of the physical environment, it is important to understand how people from different backgrounds impact the environment and experience environmental impacts differently. This course is recommended for students concurrently enrolled in GEOG 110 or who have successfully completed the course within the last three years. Students should be prepared to participate in one or more off-campus field exercises.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

GEOG-114: Weather and Climate

Do you monitor the daily weather? Are you intrigued by severe weather events like tornadoes, tropical cyclones, blizzards, and flooding rain? This course covers Earth's atmospheric phenomena, with special reference to causes and regional distribution of weather and climate, both past and present. Topics include atmospheric structure and composition, solar radiation and energy balances, temperature, seasonal changes, atmospheric moisture, clouds and fog, precipitation, air pressure, winds, air masses and fronts, cyclones, weather forecasting, climate, and climate change. Emphasis will be given to current environmental topics, including natural and anthropogenic global climate change, air pollution, and environmental justice.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Advisory: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

MACH-120: Machine Shop Theory

This is a lecture course with instruction in the fundamentals of industrial processes and machines that are required of the machinist. Shop safety practices, job planning, feeds and speeds, layout tools, hand tools, bench work, and metal-cutting machines are covered.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

MACH-123: Machine Shop III

This course includes intermediate machine shop practices. Emphasis is placed on set up of machine tool accessories: steady rests, vises, rotary tables, indexers, and precision grinding accessories: precision vice, punch former, surface grinder radius dresser. At the completion of the course, students may qualify for National Institute for Metalworking Skills (NIMS).

Credit Type: Earned units for this course are applicable to an Associate Degree.

MACH-124: Machine Shop IV

This course includes advanced machine shop practices. Emphasis is placed on high precision with low tolerance manufacturing, advanced math applications, special tool grinding, part indexing, and carbide applications. At the completion of the course, students should have completed the National Institute for Metalworking Skills (NIMS) certification competency tests in Manual Milling and Grinding Skills I.

Credit Type: Earned units for this course are applicable to an Associate Degree.

MACH-129: Manufacturing Processes

The course is designed to provide a basic understanding of the manufacturing process: need, scope, advantages, limitation, economics, application, materials, and manufacturing. An overview of different methods for industrial materials manufacturing processes including casting, imaging and coating, molding, forming, machining, joining, and additive manufacturing will be covered.

Mathematics

MATH-102: College Algebra

This course is designed for students with a strong foundation in algebra. It includes the study of polynomial rational functions and inequalities, exponential and logarithmic functions, conics, systems of nonlinear equations and inequalities, and an introduction to sequences, series, and the Binomial Theorem.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: Eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

MATH-151: Precalculus

This course is designed for students preparing to take Calculus. It deepens students' understanding of algebra and trigonometry by building on topics from College Algebra and Plane Trigonometry, both of which are foundational for Calculus students. Topics include polynomials, rational, exponential, logarithmic, and trigonometric functions and their graphs, systems of linear and nonlinear equations and inequalities, partial fraction decomposition, parametric and polar equations, and an introduction to limits.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: MATH 102 and MATH 103 or eligibility for MATH 151 as determined through the SBVC assessment process.

MATH-265: Linear Algebra

This course develops the techniques and theory needed to solve and classify systems of linear equations. Techniques that are covered include row operations, Gaussian elimination, and the algebra of matrices. The course explores the properties of vectors in n dimensions, which leads to the notion of an abstract vector space. The theory of vector spaces and matrices are introduced, and the topics include inner products, norms, orthogonality, eigenvalues, eigenspaces, and linear transformations. Applications of linear algebra are included.

Credit Type: Earned units for this course are applicable to an Associate Degree.

MATH-266: Ordinary Differential Equations

The course is an introduction to ordinary differential equations including both quantitative and qualitative methods as well as applications from a variety of disciplines. Introduces the theoretical aspects of differential equations, including establishing when solution(s) exist, and techniques for obtaining solutions, including, series solutions, and singular points, Laplace transforms and linear systems.

Credit Type: Earned units for this course are applicable to an Associate Degree.

MUS-101: Music Theory I: Fundamentals

This course studies music terminology, elements of music (pitch, duration, intensity, and timbre), rhythmic analysis, major scales and their key signatures, chromatic scales, intervals, and solfeggio syllables. It is a course designed for the beginning student with a moderate interest in the structure of music. It is also designed for the music major and as such serves as the first in a four-part series of music theory courses.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Corequisite: MUS 101L.

Departmental Advisory: ENGL 101 or ENGL 101H or eligibility as determined by the SBVC assessment process.

MUS-101L: Musicianship I

Specifically, this course applies the materials studied in Music Theory I through sight-singing (using solfeggio syllables), keyboard skills (the playing of scales and identification of pitches on the keyboard), recognition and performance of intervals, and some ear-training (melodic dictation). This course is the companion course to MUS 101.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Corequisite: MUS 101.

MUS-102: Music Theory II: Scales and Modes

This course is a foundational discussion of analytical and compositional techniques through a progressive study of the following: four-part chorale composition (in diatonic harmony) including secondary dominants and other applied chordal structures; basic introduction into contrapuntal writing (two part only), voice leading, additional non-harmonic tones and modulation to relative, parallel and distant keys. It is the second in a four-part series of music theory courses designed for the music major.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisites: MUS 101 and MUS 101L.

Corequisite: MUS 102L.

MUS-102L: Musicianship II

This course continues to focus on the study of musicianship through its components. It explores dictation skills (the notation of aural impressions), the continued use of solfeggio syllables to discern pitches within a tonal framework, keyboard fundamentals, and is designed to elevate the student's level of dictation and musical analysis. It is the companion course to MUS 102.

Credit Type: Earned units for this course are applicable to an Associate Degree.

NURS-261: Complex Care and Leadership

This is a second-year nursing course that builds upon previously learned knowledge, skills and attitudes while focusing on the application of the nursing process, discrimination of data, and identification of care priorities in order to manage complex needs of adults including adults ages 65 and over, critically ill or injured adults with single or multisystem failure. Complex Care and Leadership provides learning opportunities for leadership, community outreach, and disaster nursing. Correlated clinical experiences provide the senior student opportunities to assume nursing responsibilities in complex care areas and to function as part of an inter-professional team. Application of knowledge, skills, and attitudes (K-S-A) will occur in the hospital, on-campus skills laboratory, and simulation settings. The course also reviews graduate responsibilities for the National Council Licensure Examination (NCLEX) application and professional employment/licensure responsibilities.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Note: PREREQUISITE NURS 250 and NURS 251.

Corequisite: NURS 260.

Limitation on Enrollment: Registration is limited to students who have completed program prerequisites and have been accepted into the Nursing Program.

Oceanography

OCEAN-101: Elements of Oceanography

This course explores the geological processes that created the ocean basins, chemistry of sea water, physical motions of the oceans, and the interrelationships of biological communities with their physical environments. Oceanographers and related scientists from traditionally underrepresented groups are featured throughout this course. Environmental issues and environmental justice movements associated with the world's oceans fundamentally inform this course. Geospatial analysis of world oceans, including Geographic Information Systems (GIS) and remote sensing, is an integral component of this course. It is recommended that transfer students also enroll in the companion OCEAN 111, Elements of Oceanography Laboratory.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite/Corequisite: ENGL 101 or ENGL 101H.

Departmental Advisory: MATH 102 or higher.

WST-038: Geographic Information Systems (GIS) in Water Resources

The introductory course will provide students with a deeper understanding of geography from a water utility perspective, instruction on the basics of Geographic Information Systems (GIS), and introduce them to the core principles of how the knowledge may be applied to water resource management. GIS is used to solve real world water problems including infrastructure placement and maintenance, the difficulties associated with sourcing water, moving water, and treating water as well as the impacts of these on human populations and the natural world.

WELD-046: Shielded Metal Arc Welding - Intermediate

This is an intermediate course in the Shielded Metal Arc Welding (SMAW) process. Vertical and overhead groove welds and the lab portion of the structural weld certification for the City of Los Angeles are stressed.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Prerequisite: WELD 045.

Alternate Listing: This course is also offered as WELD-646.

WELD-048: Shielded Metal Arc Welding (SMAW) - Pipe

This is an advanced course covering Shielded Metal Arc Welding (SMAW) on pipe. American Welding Society (AWS) and American Petroleum Institute (API) standards will be covered. Focus will be on 5G and 6G welding positions.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Prerequisite: WELD 047.

Departmental Advisory: TECALC 087.

WELD-060: Fabrication and Layout - Beginning

This course is designed to provide the training needed to read blueprints, create shop drawings, and fabricate and assemble parts.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Prerequisite: WELD 010.

Alternate Listing: This course is also offered as WELD-660.

WELD-066: Preparation for Los Angeles City Welding Welding Certification - Structural

(AWS D1.1)

This course prepares students for the written Structural Steel examination offered by the City of Los Angeles Department of Building and Safety (LADBS) with a focus on the American Welding Society (AWS) D1.1 structural welding code.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Prerequisite: WELD 045.

Departmental Advisory: READ 015 or eligibility for READ 100 as determined by the SBVC assessment process.

Corequisite: WELD 046.

Alternate Listing: This course is also offered as WELD-666.

WELD-081: Gas Metal Arc Welding - Intermediate

This is the study of intermediate techniques and methods of Gas Metal Arc Welding (GMAW) and Metal-Cored Arc Welding (MCAW) in all positions and on various thicknesses of mild steel and aluminum.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Prerequisite: WELD 080.

Alternate Listing: This course is also offered as WELD-681.

WELD-091: Flux Cored Arc Welding - Self Shielded

This course introduces techniques and methods of Flux Cored Arc Welding- Self shielded (FCAW-S) in all positions and on various thicknesses of carbon steel.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Prerequisite: WELD 010.

Departmental Advisory: WELD 090.

Alternate Listing: This course is also offered as WELD-691.
