ARCH-104: The Built Environment: Culture, Profession, and Urbanization

This course surveys the built environment throughout history and across different cultures and geographies worldwide. Emphasis is on the role of architecture, and allied disciplines such as urban design and planning, in enabling colonial expansion and domination of non-western cultures. This historical survey ends with an assessment and understanding of contemporary architectural practice, along with licensing pathways and academic and professional trajectories.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

ARCH-105: Design Theories, Methods, and Visualizations

This course introduces students to the process of architectural design, exploring the built environment through different media and activities that address distinct design approaches. It includes studies of various representation techniques, media, and processes to express different design philosophies, and an introduction to the tools, techniques, and methods relevant to the design process. The course introduces students to the various scales of architectural intervention, from the dimensions of the human body all the way to the territory of the city.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

ARCH-106: Sustainability in the Built Environment

This course provides an overview of key areas of sustainability theory and practice, with a focus on how they are expressed in the built environment. Since sustainability is a cross-disciplinary field of study, the course draws from an intellectual breadth of natural and social disciplines spanning the humanities and sciences. In this course we will study how sustainability principles have guided the built environment throughout history, and how sustainability strategies have been taken up by cultures from distinct eras, geographies, and climatic regions in different ways. We will also study how sustainability is measured, valued, and understood by non-Western societies, including Indigenous ones. Specific topics across this spectrum include energy, infrastructure, environmental economics and policy, ethics, and cultural history.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

ARCH-112: Design Studio I

This introductory architecture design studio course focuses on design process, including the perceptual and physical study of space from conceptualization and form-making to visualization and presentation. Emphasis on design process includes site analysis of environmental, contextual, and cultural aspects of space, design, and the urban environment. Design investigations will focus on a small residential building for a single client that challenges students to consider the environmental and social impact of their design.

Credit Type: Earned units for this course are applicable to an Associate Degree.

ARCH-212: Design Studio III

This upper-level architectural design studio focuses on the principles and applications of environmental design in relationship to architecture, landscape architecture, and urban design and planning. The course emphasizes how sustainability and environmental considerations can be an integral part of the design process, and teaches the applicability and relevance of those considerations for questions of climate justice and equity. Design investigations will focus on a series

of a multi-unit housing complex or mixed-use building on an urban site in the San Bernardino or Los Angeles region.

ARCH-213: Design Studio IV

This upper-level architectural design studio integrates regulatory, site, and social considerations into a sustainable design response that addresses/mitigates climate risks. The focus is on sustainability and energy-efficiency, with a reflection on the environmental and social impact of an architectural design proposal on a given site and surrounding context. Emphasis is on multiple scales of design, from the detailed wall section and building envelope to the structural, energy, and spatial organizational system guiding the design process. Investigations will stress logical organization, craftsmanship, technical skills, vocabulary, and physical object-making through the design of complex building types. Design investigations will focus on a public building complex in a given neighborhood in the Southern California region that is facing social, environmental, and climate risks.

ART-132B: Intermediate Life Drawing

This course is a review of essential concepts of figure drawing and development of intermediate-level figure drawing skills with an emphasis on accurate analysis of anatomy, essential structure and further use of traditional and non-traditional drawing materials and surfaces. The student will develop a portfolio of completed figure drawings with an emphasis on the study of advanced compositional concerns. Drawings are based on a live nude model.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: ART 132A.

ART-132C: Advanced Life Drawing

This course is a continuation of Art 132B. In this class students will develop an original body of life drawings in various media and surfaces that reflect their knowledge of advanced life drawing techniques with a focus on preparing their portfolio for upper division courses at the university and college level and display in the gallery environment. Typical subjects covered in this class will include developing a body of original artwork that expresses the students personal style, portfolio development for upper division coursework, gallery preparation, presentation of finished artwork with appropriate matting and framing, and writing a formal artist statement. Drawings are based on a live nude model.

Astronomy

ASTRON-120: Introduction to Astronomy

This is an introduction to astronomy, the ultimate adventure. Our very big universe can be described by a small set of knowable rules through a logical method called science, where the excitement of an evolving and sometimes violent universe of stars and galaxies is explored. Topics include the night sky, motions of the Sun, the Moon, and the planets, light, properties and life-cycles of stars with a detailed look at our Sun, galaxies, and the origin of the universe.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Recommendation: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

ASTRON-125: Astronomy Laboratory

This course is the companion course to ASTRON 120 Introduction to Astronomy. Laboratory work provides a hands-on enrichment and deeper understanding of topics discussed in the astronomy lecture. Topics include use of star maps, identification of constellations, determination of orbits, rotation rate, and mass of celestial objects using astronomical methods of observation and analysis. Students will also perform 3-D modeling of the solar system and constellations, study the nature of light, lenses and telescopes, make some direct observations with telescopes, and utilize astronomical software.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite/Corequisite: ASTRON 120.

AUTO-010: Introduction to Hybrid and Electric Vehicle Technology

This course explores the use of hybrid and electric battery power for vehicle transportation. Topics will include safety when using high voltage, maintenance, drivability, inverter, AC/DC power transfer and battery technology, physics of battery storage and hybrid generation systems. Electric vehicle applications and their integrated systems from many manufacturers will be discussed.

BIOL-206: Organismal Biology

This course is an introduction to the diversity of organisms, their structure, function, and adaptations to the environment. The course requires participation in field trips and outdoor classroom (Living Lab Garden and Oak Garden) activities. This course is part of three introductory biology courses for the pre-professional, biology major, environmental science or others interested in an in-depth study of biology.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: BIOL 205 and eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

BIOL-207: Evolutionary Ecology

This course is an introduction to the principles of evolution and the ecological processes governing organisms and populations. The course requires participation in and completion of a field project and participation in weekend field trips and outdoor classroom (Living Lab Garden and Oak Garden) activities. This course is part of three introductory biology courses for the pre-professional, biology major, environmental science or others interested in an in-depth study of biology.

BIOL-250: Human Anatomy and Physiology I

This is the first semester of a two-semester sequence that introduces students to the basic concepts and principles of human anatomy and physiology. This course provides a foundation for pre-allied professional majors or others interested in the advanced study of human biology. Topics include inorganic and organic chemistry, body orientation and organization, cytology, histology, fluid and electrolyte balances, and the following systems: nervous, skeletal, muscular, nervous, digestive system, and metabolism. Course includes dissections of preserved specimens.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Advisory: BIOL 100 and ENGL 101 or ENGL 101H.

BIOL-260: Human Anatomy

This is a comprehensive lecture/laboratory course in human anatomy. It is organized to explore the body both regionally and systemically. The course studies gross anatomy with an extensive dissection of the cat and other significant organs. Relevant comparisons to human systems and structures are emphasized in the laboratory portion of the course. Histological and cellular anatomy are included as they apply to various structures and systems.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Recommendation: BIOL 155.

BIOL-261: Human Physiology

This course is the second semester of a two-semester sequence. It builds on an understanding of structure to explain the dynamic functions of the human body to a cellular level. Topics include physiology of the following systems: muscular, skeletal, nervous, endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive. Homeostatic mechanisms and the interrelationships of body organ systems are emphasized and enhanced with clinical illustrations.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisites: BIOL 260 and CHEM 105 or CHEM 101.

Departmental Recommendation: BIOL 100.

CHEM-105: Introduction to General, Organic and Biochemistry

This course provides a foundation for the concepts of general, organic, and biochemistry for students who wish to pursue allied health fields such as nursing. Some of the areas studied include the physical and chemical properties of common elements and compounds, the SI system, measurements and conversions, atomic structure, the periodic table, chemical equations and calculations, gases, solutions, electrolytes as well as an introduction to the bonding, naming, structure, and chemical and biological properties for different classes of organic compounds and biomolecules, with a focus on their cellular, medicinal and commercial importance.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

CHEM-150: General Chemistry I

General Chemistry I is first-semester college-level chemistry with an emphasis on the mole concept, thermochemistry, atomic and molecular structure, the relationships of intramolecular and intermolecular forces to chemical and physical properties, the periodic table, organic chemistry, and solids, liquids and gases.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisites: CHEM 101 or CHEM 105.

Corequisite: MATH 102 or placement into MATH 102 based on the SBVC Guided-Self Placement process.

Child Development

CD-075: Family Child Care Practices

This course is designed to meet the specific needs of the family child care provider. The emphasis is on learning licensing regulations, good business practices, age appropriate curriculum, healthy environments, positive guidance, and basic child development. Other topics include creating partnerships with parents, maintaining health and safety and working with children from diverse backgrounds, including children with special needs and disabilities.

CD-105: Child Growth and Development

This course examines the progression of development in the physical, cognitive, social and emotional domains and identifies developmental milestones for children from conception through adolescence. There is an emphasis on interactions between biological processes and environmental factors. Students observe children, evaluate individual differences, and analyze characteristics of development at various stages according to developmental theories.

ECON-200H: Principles of Macroeconomics - Honors

This course provides an introduction to macroeconomic theory and the role of fiscal and monetary policies in economics with special emphasis on national economic problems, aggregate measures of economic activity, macroeconomic equilibrium, economic growth, the business cycle, financial institutions and international economics. This course is intended for students in the Honors Program but is open to all students who desire more challenging coursework.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

Alternate Listing: This course is also offered as ECON-200.

Education (SBVC)

EDUC-200: Introduction to Elementary Education

This course introduces students to the concepts and issues related to teaching diverse learners in contemporary public schools (K-12). Topics include historical and philosophical foundations of the American education system, teaching as a profession and career, contemporary education issues, California Content Standards and framework, and teacher performance standards. In addition to class time, 45-hours of structured fieldwork are required at an approved public school elementary classroom with a certified classroom teacher and students that represent California's diverse population. Proof of a negative TB test and fingerprint clearance are required for classroom observations.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

ETHS-103: Ethnicity and Identity in Media

This course explores the impact of identity on film as an art form and cultural artifact by confronting

ideologies of race, class, gender, and sexual orientation as they are reflected in cinematic representation. American film is used as the primary lens through which to view how social, political, and cultural values have been formulated over the last century. Students analyze major films, figures, character types, and narrative strategies to evaluate the relationship between film and identity. (This course is also offered as FTVM 103)

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Advisory: ENGL 101 or ENGL 101H.

Alternate Listing: This course is also offered as FTVM-103.

GIS-098: GIS Work Experience

This course involves supervised training, in the form of on the job employment that will enhance the student's knowledge in the selected field of study. The student's major and job must match. For paid work, 75 hours = 1 unit; for volunteer work, 60 hours = 1 unit. Students may earn a total of 16 units toward graduation in Work Experience 098 courses. See department for specific guidelines.

Credit Type: Earned units for this course are applicable to an Associate Degree.

GIS-100: Map Interpretation and Geospatial Analysis

Have you ever wondered how the traffic map works on your phone? Do you enjoy exploring maps and satellite images online? This class is an introduction to maps, images and geospatial techniques and technologies. The technologies covered in this course include map and aerial photograph interpretation, tabular data, spatial statistics, cartography, Global Positioning Systems (GPS), automated and web-based mapping, remote sensing, and Geographic Information Systems (GIS), all of which aid in data collection, analysis and presentation. Theories, methods, and ethics within GIS, GPS, remote sensing, cartography, and field work play a central role in this course. This course also highlights how GIS and geospatial analytical tools can address longstanding issues related to economic, environmental, political, racial, and social justice. (This course is also offered as GEOG 100).

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Departmental Advisory: ECON 208 or MATH 108 or MATH 108H or PSYCH 105 and ENGL 101 or ENGL 101H.

GIS-130: Introduction to Geographic Information Systems (GIS)

How do corporations know where to locate retail stores and restaurants? How do epidemiologists know how to confront epidemics, pandemics, and related disease outbreaks? How does your utility provider know the location of power outages and water leaks? How do demographers create maps based on ethnicity, socioeconomic status, age, gender, religious affiliation, and other population characteristics? The answers to these questions and more are found within Geographic Information

Systems (GIS). This course provides an introduction to the fundamentals of Geographic Information Systems (GIS), including the history of automated mapping. It includes a brief introduction to basic cartographic principles, including map scales, coordinate systems and map projections. GIS hardware and software are implemented, as are various applications of GIS technology used in environmental science, business and government. Using automatic mapping software like ArcGIS Online, ArcGIS Pro, ArcMap, and Story Maps, you will create maps that address a variety of local to global issues. GIS-135: Spatial Analysis with GIS

Cloud computing, artificial intelligence (AI), web GIS, and automated mapping are becoming increasingly important within spatial analysis. This course is an introduction to spatial analysis with fundamental concepts and analytical procedures used to simplify complex spatial modeling. Specific methods covered include spatial queries, buffering, overlay, interpolation, network analysis, surface analysis, and spatial autocorrelation. Spatial analysis tools and services have the capacity to highlight and address long-standing issues of economic, environmental, racial, and social justice, as well as environmental sustainability.

GEOG-102: Cultural Geography

Are you fascinated with the enormous diversity of culture, language, religion, economics, politics, urbanization, agriculture, and ethnicity around the world? Have you ever wondered how this developed? Are you concerned about human rights, social justice, climate change, and access to clean drinking water, healthcare, education, and resources? Using the tools of geography, this course will help you to understand how humans interact each other and how humans interact with the environment.

GEOG-110: Physical Geography

You may have noticed that Earth's atmosphere, life forms, water resources, and landforms vary considerably from one place to another. This class helps you to understand how and why these variations occur, how the environment impacts us humans, and how we humans impact the environment. People from different backgrounds experience environmental impacts differently, so environmental justice is interwoven throughout this course. GEOG 111/GEOG 111H is strongly recommended for students who desire to transfer to CSU/UC. It is recommended that students complete GEOG 111/GEOG 111H within three years of completing GEOG 110.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

GEOG-111: Physical Geography Laboratory

In this laboratory companion for the GEOG 110 physical geography lecture course, you will use hands-on, in-class and field-based experiences to better understand and appreciate how and why Earth's atmosphere, life forms, water resources, and landforms vary considerably from one place to another. Because we humans are part of the physical environment, it is important to understand how people from different backgrounds impact the environment and experience environmental impacts differently. This course is recommended for students concurrently enrolled in GEOG 110 or who have successfully completed the course within the last three years. Students should be prepared to participate in one or more off-campus field exercises.

Do you monitor the daily weather? Are you intrigued by severe weather events like tornadoes, tropical cyclones, blizzards, and flooding rain? This course covers Earth's atmospheric phenomena, with special reference to causes and regional distribution of weather and climate, both past and present. Topics include atmospheric structure and composition, solar radiation and energy balances, temperature, seasonal changes, atmospheric moisture, clouds and fog, precipitation, air pressure, winds, air masses and fronts, cyclones, weather forecasting, climate, and climate change. Emphasis will be given to current environmental topics, including natural and anthropogenic global climate change, air pollution, and environmental justice.

Geology

GEOL-101: Introduction to Physical Geology

Earth is an amazing place, and for millennia cultures and civilizations have attempted to explain the various topics that relate to our understanding of our blue planet. From the various minerals, rocks, and resources found on it that power our cellphones and televisions to the dramatic features, such as mountains, volcanoes, canyons etc. that shape our landscape. From the consequential natural disasters such as earthquakes that we in California and people around the world deal with on an annual basis to the disproportionate effects of global climate change. In this course we build a fundamental understanding of these topics (and many more) by emphasizing the overarching Theory of Plate Tectonics, the processes that created the continents and the ocean basins, and the internal

and external processes that change the landscape and impact the planet in a variety of ways we seek to put ourselves in the context of our planet.

Machinist Technology

MACH-021: Machine Shop

This course prepares students for entry into the machining industry. Students will explore career opportunities and requirements of a professional machinist. Content emphasizes beginning skills key to the success of working in the machining industry. Students study workplace safety and organization, job-related mathematics, basic blueprint information, basic measuring operations, benchwork skills, and the history of manufacturing.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Departmental Recommendation: MACH 090 and MACH 120.

MACH-090: Mechanical Print Reading

This course covers basic drafting and print standards, fundamentals of shape description,

fundamentals of size description and annotation, industrial drawing types, and specialized parts and prints. The course content focuses on interpreting and applying geometric dimensioning and tolerancing (GDT) in machining through math formulas, tolerancing systems, modifiers, symbols, datums, and tolerances of form, profile, orientation, run-out and location. Students examine and interpret the generation of a working drawing, and how they are developed as a team effort between design, drafting, manufacturing and quality control.

MATH-103: Plane Trigonometry

This course provides a study of trigonometric functions, identities, trigonometric equations, periodicity, graphs of trigonometric functions, inverse trigonometric functions, solving right triangles, solving triangles using the Law of Cosines and Law of Sines, polar coordinates, and an introduction to vectors.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Prerequisite: Eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

MATH-106: Mathematical Concepts for Elementary School Teachers

This course focuses on the development of quantitative reasoning skills through in-depth, integrated exploration of topics in mathematics, including real number systems and subsystems. Emphasis on comprehension and analysis of mathematical concepts and applications of logical reasoning. This course is designed for future elementary school teachers.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: Completion of intermediate algebra or appropriate college-level placement based on the SBVC Guided-Self Placement process.

MATH-108H: Introduction to Probability and Statistics - Honors

This course is an introduction to probability, descriptive and inferential statistics, with applications to the natural sciences, life science, health science, education, business, economics, and the behavioral sciences. This course includes content and experiences appropriate for students wishing to earn honors credit. This course is intended for students in the Honors Program, but is open to all students who desire more challenging course work.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: Completion of intermediate algebra or appropriate college-level placement based on the SBVC Guided-Self Placement process.

Alternate Listing: This course is also offered as STAT-C1000, STAT-C1000H.

MATH-120: Mathematical Financial Planning

Learn the fundamentals of personal financial planning. This is a course designed to help students plan their financial life from student loans to retirement and investment strategies. Topics include credit management strategies, loan evaluation, buying and leasing automobiles, buying a house, investing and portfolios, insurance, taxes, and retirement planning. All topics developed through rigorous quantitative and mathematical applications in linear, algebraic, exponential, and logarithmic functions, sequences, series, and an introduction to portfolio risk analysis. Use of technology and financial calculators for financial planning.

MUS-101: Music Theory I: Fundamentals

This course studies music terminology, elements of music (pitch, duration, intensity, and timbre), rhythmic analysis, major scales and their key signatures, chromatic scales, intervals, and solfeggio syllables. It is a course designed for the beginning student with a moderate interest in the structure of music. It is also designed for the music major and as such serves as the first in a four-part series of music theory courses.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Corequisite: MUS 101L.

MUS-102: Music Theory II: Scales and Modes

This course is a foundational discussion of analytical and compositional techniques through a progressive study of the following: four-part chorale composition (in diatonic harmony) including secondary dominants and other applied chordal structures; basic introduction into contrapuntal writing (two part only), voice leading, additional non-harmonic tones and modulation to relative, parallel and distant keys. It is the second in a four-part series of music theory courses designed for the music major.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisites: MUS 101 and MUS 101L.

MUS-102L: Musicianship II

This course continues to focus on the study of musicianship through its components. It explores dictation skills (the notation of aural impressions), the continued use of solfeggio syllables to discern pitches within a tonal framework, keyboard fundamentals, and is designed to elevate the student's level of dictation and musical analysis. It is the companion course to MUS 102.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisites: MUS 101 and MUS 101L.

NURS-260: Psychiatric-Mental Health Nursing

This course focuses on the nurse's role in the collection of assessment data, identifying the relevance of the data collected, the analysis of patient/client priorities, the implementation of nursing interventions, and evaluation of care for diverse patient population including children, adolescents, adults, and older adults with mental health disorders. Psychiatric nursing also focuses on

neurobiological theories, risks and interventions for suicide, substance abuse, and other mental health disorders. Application of KSAs will occur in the hospital, on-campus skills laboratory, and simulation settings.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Prerequisite: NURS 250 and NURS 251.

Corequisite: NURS 261.

Limitation on Enrollment: Registration is limited to students who have completed program prerequisites and have been accepted into the Nursing Program.

NURS-261: Complex Care and Leadership

This is a second-year nursing course that builds upon previously learned knowledge, skills and attitudes while focusing on the application of the nursing process, discrimination of data, and identification of care priorities in order to manage complex needs of adults including adults ages 65 and over, critically ill or injured adults with single or multisystem failure. Complex Care and Leadership provides learning opportunities for leadership, community outreach, and disaster nursing. Correlated clinical experiences provide the senior student opportunities to assume nursing responsibilities in complex care areas and to function as part of an inter-professional team. Application of knowledge, skills, and attitudes (K-S-A) will occur in the hospital, on-campus skills laboratory, and simulation settings. The course also reviews graduate responsibilities for the National Council Licensure Examination (NCLEX) application and professional employment/licensure responsibilities.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Note: PREREQUISITE NURS 250 and NURS 251.

Corequisite: NURS 260.

Limitation on Enrollment: Registration is limited to students who have completed program prerequisites and have been accepted into the Nursing Program.

Oceanography

OCEAN-101: Elements of Oceanography

This course explores the geological processes that created the ocean basins, chemistry of sea water, physical motions of the oceans, and the interrelationships of biological communities with their physical environments. Oceanographers and related scientists from traditionally underrepresented groups are featured throughout this course. Environmental issues and environmental justice movements associated with the world's oceans fundamentally inform this course. Geospatial analysis of world oceans, including Geographic Information Systems (GIS) and remote sensing, is an integral component of this course. It is recommended that transfer students also enroll in the companion OCEAN 111, Elements of Oceanography Laboratory.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite/Corequisite: ENGL 101 or ENGL 101H.

Departmental Advisory: MATH 102 or higher.

Physics

PHYSIC-101: Introductory Physics

This introductory, algebra-based, physics course is an exploration of the physical principles ranging from classical mechanics to modern physics, which shape our lives. Students will be better equipped to make connections between the concepts of physics and their everyday world. This class includes a hands-on laboratory to bridge the connection between theory and everyday life. This course also explores the connections between physics and other fields of science, technology, and society.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

PSYTCH-600: Psychiatric Technician Skills Lab

This noncredit class offers inclusive support to students by assisting them in understanding the course-specific content within the Psychiatric Technology program. The class is designed to accommodate diverse learning styles and needs, with activities such as dosage calculation practice, demonstrations, and practice of essential psych tech skills and procedures. These activities help students develop competencies in various areas, including physical assessment, isolation techniques, oxygenation, wound care, urinary catheterization, medication administration, and other specialized medical and surgical skills. Instructional services are tailored to meet the needs of all students and may include supervised individual or group tutorials, computer-assisted instruction, and testing. Enrollment in this class is open to all students currently enrolled in the SBVC Psychiatric Technology program, ensuring equitable access to learning opportunities for all participants.

Credit Type: Noncredit course.

Grading Restriction: Graded on a Credit/No Credit basis only.

Limitation on Enrollment: Students must be enrolled in at least one other Psychiatric Technology course at San Bernardino Valley College or a recent graduate of the Psychiatric Technician program.
